Talagang, Pakistan

PROFESSIONAL SUMMARY

I am a passionate Data Science and AI enthusiast skilled in Python, Machine Learning, Deep Learning, MLOps, and Computer Vision. I am proficient in building predictive models, analyzing datasets, and applying AI/ML techniques to solve real-world problems. I have strong skills in data preprocessing, visualization, and model evaluation with a focus on accuracy and scalability. I have successfully completed the “**Data Science & AI**” course from **atomcamp Islamabad**, where I enhanced my knowledge and practical skills in the field. Alongside this, I am currently working at **atomcamp**, an **EdTech company**, as a **Trainer and Bootcamp Coordinator**, where I contribute to training delivery and program coordination. I am passionate about continuous learning, exploring new technologies, and delivering innovative data-driven solutions

EDUCATION

Data Science & AI Bootcamp

Atomcamp, Islamabad

June 2025 – Nov 2025

Bachelor of Science in Computer Science (BSCS)

University of Sargodha, Sargodha, Pakistan

2021 – 2025 | Current CGPA: 3.32

Intermediate in Computer Science (ICS)

Science College, DSB, Pakistan

2019 – 2021 | Marks: 1052/1100

TECHNICAL SKILLS

- **Programming & Data Handling:** Python, SQL
 - **Data Science & Analytics:** Exploratory Data Analysis (EDA), Data Preprocessing, Data Visualization
 - **Machine Learning & AI:** Model Development, Predictive Analytics, AI-Powered Solutions
 - **Deep Learning:** Neural Networks, CNNs, RNNs, TensorFlow, Keras, PyTorch
 - **Business Intelligence Tools:** Power BI (Dashboards, Reports, Data Modeling)
 - **Databases:** SQL, Firebase
 - **Tools & Platforms:** Google Colab, VS Code, Git, GitHub, Windows
-

PROJECT EXPERIENCE

Deep Learning Project – Image Classification (using CNNs in Keras/TensorFlow)

- Built and trained a **Convolutional Neural Network (CNN)** using Keras/TensorFlow for image classification.
- Applied **data preprocessing and augmentation** to improve accuracy and reduce overfitting.
- Optimized the model with **Dropout layers, hyperparameter tuning, and performance evaluation** (accuracy, confusion matrix).
- Gained practical experience in **deep learning frameworks** and result visualization with Matplotlib/Seaborn.

Personality Prediction using EDA and Machine Learning

- Performed **Exploratory Data Analysis (EDA)** on a personality traits dataset to identify patterns and insights.
- Cleaned and preprocessed data by handling duplicates, missing values, and inconsistencies.
- Conducted **data visualization** using Matplotlib and Seaborn to explore feature distributions and correlations.
- Applied **data imputation techniques** to handle missing values for categorical attributes.
- Prepared dataset for **Machine Learning model development** aimed at personality prediction.
- Tools & Technologies: **Python, Pandas, Matplotlib, Seaborn, Jupyter Notebook**

Customer & Sales Insights from Amazon Clothing Transactions

- Cleaned and preprocessed 25,000+ sales records, handling missing values, duplicates, outliers, and inconsistencies.
- Performed EDA (univariate, bivariate, multivariate) to uncover trends in sales, returns, customer behavior, and delivery performance.
- Derived actionable insights and visualized findings using time series, heatmaps, bar charts, and scatter plots.

Hospital Intelligence Dashboard (SQL Project)

- Queried hospital datasets (patients, encounters, procedures, billing, diagnoses, medications) to extract actionable insights.
- Analyzed encounter trends, financial coverage, and procedure costs to support hospital management decisions.
- Applied advanced SQL (CTEs, CASE, pivot tables) for segmentation and diagnosis analysis by age groups.

Candy Sales Dashboard (Power BI Project)

- Designed a **Power BI dashboard** by integrating multiple datasets (Sales, Products, Targets) into a **star schema model**.
- Created **calculated columns and DAX measures** (Total Sales, Units Sold, Avg. Gross Profit per Unit, Sales Category).
- Built interactive visuals including **KPIs, bar charts, line charts, slicers, and conditional formatting** to analyze sales trends and performance.
- Delivered actionable insights on **top products, regional/seasonal trends, and division-level target vs. actual performance**.

ADDITIONAL INFORMATION

- **LinkedIn:** https://www.linkedin.com/in/hadeeqa-nisa-0b19212a6?utm_source=share&utm_campaign=share_via&utm_content=profile&utm_medium=android_app
- **Availability:** Open to remote & onsite roles
- **Languages:** English (Fluent), Urdu (Native)

Passionate about building seamless digital experiences and always eager to learn new technologies!
